Ghost Avenue is hailing from the suburbs of Oslo Norway and was born in 2002 as a result of what they thought was a lack of good new bands playing traditional heavy metal at the time.

The music they deliver is traditional/classic hard rock and heavy metal. The inspirations comes from a variety of styles, but the main influence is from the golden era of the 80's hardrock and heavy metal. **Ghost Avenue** has respect and understanding of a genre who despite changes in trends and fashion unaffected thunders on with passion and love for their craft. They try to capture the traditional style, but with their own sound and approach to their music so that it's fresh and updated for both old and new generations.

The band swears to melodic and catchy songs, tight riffs, twin guitars, screaming solos, pounding bass, hard hitting drums and balls out vocals. This approach really comes across at live shows. The band will allways put their hearts out there and deliver 110% in your face and energetic shows! The feedback from the music industry and fans shows that **Ghost Avenue** flies the flag high for traditional and classic hard rock and heavy metal.
